PROFESSIONAL SUMMARY

Senior Business Analyst with 13+ years of experience in business analyst workstreams. Known for hands-on execution, stakeholder alignment, structured problem solving, and measurable business impact.

CORE SKILLS

BRD documentation, Support, acceptance criteria, stakeholder reporting, Agent, KPI tracking, Excel, Remote, process mapping, Power BI, UAT, data analysis, Tableau

EXPERIENCE

Senior Business Analyst | FinSight Partners | 2025 - Present

- Managed stakeholder communication, status reporting, and decision notes for senior management reviews.
- Reduced weekly reviews using Support and acceptance criteria to identify bottlenecks, risks, and execution gaps.
- Automated quality checks and escalation workflows across 3 business units or sites.

Business Systems Analyst | PeopleNest | 2021 - 2023

- Tracked cross-functional delivery with operations, finance, product, and leadership teams for high-priority workstreams.
- Scaled quality checks and escalation workflows across 5 business units or sites.
- Supported weekly reviews using Support and acceptance criteria to identify bottlenecks, risks, and execution gaps.
- Implemented stakeholder communication, status reporting, and decision notes for senior management reviews.

Business Systems Analyst | NextWave Labs | 2021 - 2022

- Launched weekly reviews using Support and acceptance criteria to identify bottlenecks, risks, and execution gaps.
- Implemented cross-functional delivery with operations, finance, product, and leadership teams for high-priority workstreams.
- Built stakeholder communication, status reporting, and decision notes for senior management reviews.
- Optimized BRD documentation initiatives that improved turnaround time by 33% across 16 stakeholders.

SELECTED PROJECTS

- Business Analyst Performance Improvement Plan: Used BRD documentation and acceptance criteria to define problem areas, success metrics, actions, and implementation owners.
- KPI and Workflow Redesign for Tech Support Agent - Remote US: Used Support and stakeholder reporting to define problem areas, success metrics, actions, and implementation owners.
- Stakeholder Dashboard and Review Cadence: Used acceptance criteria and Agent to define problem areas, success metrics, actions, and implementation owners.
